OUR COMMITMENT TO SAFE TRANSPORT

At EJ's Solutions, we understand the critical importance of safely transporting dangerous goods to protect people, property, and the environment. This policy serves as a comprehensive guide for all employees and contractors involved in our supply chain and logistics operations, ensuring that dangerous goods are handled and transported with the utmost care and compliance.

Defining Dangerous Goods

Dangerous goods are materials or substances that pose a significant risk to health, safety, property, or the environment if not properly managed during transportation. These can include explosive, flammable, toxic, corrosive, and radioactive materials, among others.

Categories of Dangerous Goods

Dangerous goods are classified into nine categories based on their specific characteristics:

- ▶ Explosives
- ▶ Gases
- ▶ Chemicals
- ▶ Flammable Solids
- ▶ Oxidizing Substances
- ▶ Toxic Substances
- ▶ Infectious Substances
- ▶ Radioactive Materials
- ▶ Miscellaneous Dangerous Goods

Safe Transport of Dangerous Goods

The transportation of dangerous goods at EJ's Solutions is conducted in strict accordance with national and international regulations and standards. We are committed to ensuring that all shipments meet these rigorous requirements to prevent any harm or incident.

Choosing the Right Mode of Transport

Dangerous goods can be transported via various modes, including road, rail, sea, and air. The selection of the appropriate transport mode is based on the nature of the goods, the distance to be covered, and the destination, ensuring the safest and most efficient delivery.

Employee and Contractor Responsibilities

All employees and contractors involved in the transport of dangerous goods have specific responsibilities to uphold:

Proper Labeling and Documentation

Every shipment of dangerous goods must be correctly labeled and documented in line with national and international regulations. Accurate documentation is essential for tracking and safety.

Training

Employees and contractors must undergo comprehensive training on the safe handling and transport of dangerous goods. This includes knowledge of emergency procedures in the event of accidents or incidents.

Packaging

Dangerous goods must be securely packaged to prevent leaks, spills, or breakages during transport. Packaging must meet the required standards to ensure the integrity of the shipment.

Compliance

Strict adherence to all relevant national and international regulations and standards governing the transport of dangerous goods is mandatory. Compliance is non-negotiable and is essential to maintaining safety and regulatory adherence.

Reporting

Any accidents or incidents involving dangerous goods must be immediately reported to the appropriate authorities and to EJ's Solutions. Prompt reporting allows for quick action and mitigation of any potential risks.

Conclusion

EJ's Solutions is fully committed to the safe and responsible transport of dangerous goods. Compliance with this policy is mandatory for all employees and contractors involved in these activities. Non-compliance will result in disciplinary action, up to and including termination of employment or contract.

At EJ's Solutions, safety is not just a policy—it's a core value that guides everything we do. Together, we can ensure that dangerous goods are transported safely, protecting our people, our community, and our environment.
